

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously presented) Luggage comprising: an interface for cooperating with one or more electronic and/or wireless devices; and a power source, wherein said interface facilitates the cooperation between said one or more electronic and/or wireless devices and said power source and wherein a power generation assembly cooperates with one or more wheels of the luggage such that said power source is powered by rotatably actuating said one or more wheels.

2. (Previously presented). The luggage of claim 1, wherein said interface has one or more connectors.

3. (Previously presented) The luggage of claim 2, wherein said one or more connectors accommodate different types of connections including cable type connections, docking type connections, radio

type connections, infrared type connections, or wireless type connections, or any combination of the same.

4. (Previously presented)      The luggage of claim 1, wherein said power source is a rechargeable battery.

5. (Previously presented)      The luggage of claim 4, wherein said rechargeable battery is recharged via said power generation assembly.

6. (Canceled)

7. (Previously presented)      The luggage of claim 4, wherein said rechargeable battery is rechargeable via an external power source.

8. (Previously presented)      The luggage of claim 4, wherein said rechargeable battery is integral with a surface of the luggage.

9. (Previously presented)      The luggage of claim 1, further comprising an antenna integral with an outside surface of the

luggage.

10. (Previously presented) The luggage of claim 9, wherein said antenna enhances the capacity of said one or more electronic and/or wireless devices.

11. (Previously presented) The luggage of claim 9, wherein said antenna is formed from a printed conductive ink printed on said outside surface of the luggage.

12. (Previously presented) The luggage of claim 9, wherein said antenna cooperates with said one or more electronic and/or wireless devices via said interface.

13. (Currently amended) Luggage comprising: an interface for cooperating with on one or more electronic and/or wireless devices; and an antenna integral with an outside surface of the luggage, one or more electronic and/or wireless devices; and an integral power source that cooperates with one or more wheels of the luggage such that said integral power source is powered by rotatably actuating

said one or more wheels, wherein said interface facilitates the cooperation between said one or more electronic and/or wireless devices and said antenna.

14. (Previously presented) The luggage of claim 13, wherein said antenna has a fiber construction.

15. (Previously presented) The luggage of claim 13, wherein said antenna is formed from a printed conductive ink printed on said outside surface of the luggage.

16. (Previously presented) The luggage of claim 13, wherein said antenna cooperates with said one or more electronic and/or wireless devices via said interface.

17. (Currently amended) Luggage comprising: an interface for cooperating with one or more electronic and/or wireless devices; and a wireless communication system integrally formed with an outside surface of the luggage; and an integral power source that cooperates with one or more wheels of the luggage such that said

integral power source is powered by rotatably actuating said one or more wheels, wherein said interface facilitates the cooperation between said one or more electronic and/or wireless devices and said wireless communication system.

18. (Canceled)

19. (Previously presented) The luggage of claim 17, wherein said interface has one or more connectors.

20. (Previously presented) The luggage of claim 19, wherein said one or more connectors accommodate different types of connections including a cable type connection, a docking type connection, a radio type connection, an infrared type connection, or a wireless type connection, or any combination of the same.

21. (Previously presented) The luggage of claim 9, wherein said antenna has a fiber construction.

22. (Previously presented) The luggage of claim 21, wherein said

fiber construction forms a portion of an outside surface of the luggage.

23. (Previously presented) The luggage of claim 14, wherein said fiber construction forms a portion of said outside surface of the luggage.

24. (Previously presented) The luggage of claim 17, wherein said antenna has a fiber construction.

25. (Previously presented) The luggage of claim 24, wherein said fiber construction forms a portion of said outside surface of the luggage.

26. (Canceled)
